Texas Natural Healthcare: Bio-Energetic Disclaimer

As a patient of Texas Natural Healthcare, I clearly understand that I am not being treated for any specific disease. I understand that the treatment received at this office is for the purpose of rebalancing both the structure and bio-energetic reflexes of the body.

The nutritional supplements received at this office or recommended from this office are not drugs or medicines. They are special vitamin, amino acid, mineral food complexes, homeopathy and/or herbal formulations.

The Reflex Analysis use at this office is only used to find increased bio-energetic points, which may indicate a deficiency. This work is not and cannot be used to render a physical diagnosis, nor is this work linked to any type of diagnosis.

As with all health care treatment, a guarantee cannot be given that such treatment will result in a restoration of health.
